

SCORING

Indoors and Out!

Indoors

Golden Rules:

No X rings! (either FITA or Archery GB)

Only 10's are golds!

FITA's should count 10's and 9's, and not hits

Indoor Scoring 3 spots

Golden Rules:

Determine the individual arrow values

Take the lowest three arrow values

Determine if any penalty is to be applied for shooting out of time

Outdoor Scoring

For all FITA rounds – x's apply to any bow style
FITAs should record 10's and x's, but not hits

For six gold end claims, if a metric round, both 9's and 10's count

Outdoor scoring

If too many arrows are shot – score the lowest six, or three depending on the rules being followed

If an arrow is then shot out of time – deduct the highest value.

For FITA – if deducting the highest value, don't forget to record it (record and cross through, and initial on the scoresheet) in case of appeal

Don't be afraid to spot check the scoring

Outdoor scoring

Determining an arrow value

Always use a magnifying glass – it aids your eyesight!

Look from one side, then the other, then call the value – make sure it is recorded correctly

If unsure, then always “give benefit of doubt” to the archer – however, don’t tell them this, just call it!

In FITA, if an archer touches the face or arrows, you must still call the value as you see it, but remind them not to do this in future
